Registration:

**HD72KHB**

Fuel:

**Electric**

This is an Audi e-tron GT, registered in 2023. As an electric car with four-wheel drive, it combines performance with environmental consciousness. This particular model comes with the Comfort and Sound Package, which includes LED headlights and a 360-degree camera for parking assistance. The interior boasts a Leather Pack and heated front seats for added comfort, complemented by a heated, three-spoke, flat-bottom steering wheel. The LED headlights also feature Function-On-Demand preparation. Having had only one previous owner, this e-tron GT is ready for its next adventure. One of the great things about this car is its impressive 93 kWh battery, offering a range of up to 303 miles when new. Charging at home using a 7kW charger takes approximately 14 hours for a full charge. For those needing a quicker top-up, public charging can take the battery from empty to 80% in as little as 24 minutes. This makes it a practical choice for both daily commutes and longer journeys, offering convenience and efficiency that sets it apart from other vehicles in its class.
